

March 2026 – Evermuch Technology’s Australian and First New Zealand Visit

During early March, Evermuch Technology’s Managing Director, Humphrey Chan, travelled to Australia alongside our Australian based Business Development Director, Sean Griffin, to meet with a number of existing and prospective customers.

During a highly productive week, the team visited Brisbane, Sydney, and Melbourne, holding a series of meetings that resulted in several new partnerships being established for both subcontract component supply and full box-build projects.

Following the Australian visit, Humphrey and Sean continued to New Zealand’s North Island, visiting Wellington, Auckland, and Tauranga. This long-anticipated and much-overdue trip proved both insightful and rewarding.

Having long admired New Zealand’s strong entrepreneurial culture and globally recognised export sector, the team was delighted to identify several exciting opportunities for collaboration with innovative local companies.
